HOT ROCKS

*The dining revolution
is here*

NOW BEING SERVED

NO OIL OR FAT USED

Hot Rocks is cooking on volcanic stones
No oil or fat is used

Your choice of meat, fish, chicken etc is placed on the volcanic stone which has been heated for 6-8 hours. This seals the food to lock in the nutrients and juices. The rock and food is then brought to your table where it continues to cook while you eat.

This means your last bite is as hot as the first.

Hot Rocks Dining NOW available at Lake Charlotte Winery
